Vehicle Information

Year: _____ # of Doors: 2 4 Body Style*: _____
Make: _____ Body Type: Factory Customized Aftermarket Race
Model: _____ Body Brand: _____

Other Notes:

*In an effort to insure order accuracy, it is important to know some detailed vehicle information. If the body is a Hard Top, Sedan/Post, Hatch, Coupe/Trunk style vehicle. Please use term that fits your make and model. Body type is intended to state if you are using an aftermarket race body or has a body with original production dimensions. Check the box next to the option that best suits your vehicle. If your vehicle has been customized (chop top, modified window frame, flush fit glass etc) check customized. If your body is an aftermarket fiberglass/composite race type body please check after market race and print the body brand in the provided box. If body is steel or fiberglass (ie 32Ford,Corvette, Cobra or reproduction body) with production dimensions please insert [OEM] in box. Use the Other Notes section to give specific details regarding your vehicle.

Vehicle Measurements

Instructions

Please use the following instructions to correctly measure your windows: You will need to use a flexible tape measure for all measurements, as the measurements should be taken from the outside of the vehicle with the tape laying flat to the outside surface of the glass. It is very important that the tape measure follow the contour of the glass. Record the measurements in the form listed below using the diagram on the next page as a guide for measurement points. **A** is the measurement for height taken in the center of the window and following the contour of the window. **B** is the measurement for width taken across the widest point of the window. Once again with the tape laying flat on the outer contour of the glass. This measurement might need to be extended for quarter and side windows if the perimeter is offset (see illustration). **B** dimension for doors should also include the vent glass if your vehicle is so equipped see Note*. **C** is the measurement across the top contour of the window which is usually at or near the top. Keep in mind that it is YOUR responsibility to make sure that these dimensions are accurate for your vehicle.

| Vehicle Dimensions | | | | |
|---------------------------|----------|----------|----------|--------------|
| Location | A | B | C | Notes |
